Part III, Line 1a	The Hospital does not recognize contributions of works of art, historical treasures, and similar assets when the collection items are held for public exhibition and are protected, kept unencumbered, cared for, and preserved. Current collections include a sculpture and a artwork donated for display in the hospital building.

Supplemental Information

Return Reference	Explanation
Part X, Line 2	<p>The Hospital is a tax-exempt organization under Section 501(c)(3) of the Internal Revenue Code. The Hospital is also exempt from state income taxes on related income. The Hospital has no taxable business income unrelated to its exempt activities and, therefore, no provision for income taxes has been recorded. The Hospital applies GAAP for recognition of uncertainty in income taxes and prescribing a recognition threshold and measurement attribute for the recognition and measurement of a tax position taken or expected to be taken in a tax return. The Hospital has analyzed tax positions taken for filing with the Internal Revenue Service and all state jurisdictions where it operates. The Hospital believes that income tax filing positions would be sustained upon examination and does not anticipate any adjustments would result in a material adverse effect on its financial condition, results of operations, or cash flows. The Hospital is subject to examination by taxing jurisdictions, for the previous three tax years. Currently, there are no examinations in progress. The Hospital's policy is to classify income tax related interest and penalties to interest expense and miscellaneous expense, respectively, if applicable.</p>

Madison Valley Medical Center	Part V, Section B, Line 5 The Madison County Health Department, the Montana Department of Public Health and Human Services (DPHHS) and representatives from Madison Valley Medical Center used The Community Assessment for Public Health Emergency Response (CASPER) methodology to gather information from 109 households from the Madison Valley Medical Center Hospital District. The CASPER methodology allows for accurate and timely household level data that can be generalized for a larger population using a valid statistical driven model. Random sampling of geographic clusters were created from US census maps. Approximately seven houses were surveyed from each cluster identified. The surveys were completed using face-to-face interviews. The Community Health Needs Assessment was led by Kerry Pride, DVM, MPH, DACVPM from the Montana Department of Public Health and Human Services.
